

**Analysts and Senior Analysts**  
**Salary: £24,000 - £36,000 DOE**  
**Location: Porton Down**  
**Ref: 1603418**

Dstl is responsible for designing, developing and applying the very latest in science and technology for the benefit of UK defence and security, across government. We work with the best people with the best ideas around the world – from very small companies to world-class universities, huge defence companies and sometimes other nations.

As either an Analyst or Senior Analyst, you'll deliver high-profile, high-impact analysis for the MOD, Home Office or other government departments. With relevant expertise, you'll join the Chemical Biological Radiological and Nuclear Operational Analysis team and influence decisions that'll impact the lives of those in the military.

Part of your role will see you leading the collection, management and analysis of data and information. You'll also gain an understanding of the military and security domains, and the threats they are facing. Plus, you'll write insightful and useful customer reports. At a more senior level, you'll mentor junior members and grow the technical capability of the team.

Degree-educated in a relevant subject, you'll have a strong understanding of analysis methods and their application. This'll be supported by your knowledge of the UK armed forces and the CRBN capability area. Confident and credible, you'll naturally influence others with your strong communication skills. While you'll thrive when working on your own, you'll also work seamlessly in a team and inspire those around you to think innovatively. A natural problem-solver, you'll thrive under pressure and enjoy coming up with creative solutions.
